

General Education Foundations Definition

Central to any undergraduate university program, the General Education Foundations sequence enhances the major focus and prepares students for relevance and success in our ever more complex and diverse society.

Skills in critical thinking, effective communication, and information literacy couple with a range of subjects that bolster the program of study by broadening and deepening their understanding and appreciation of all that the world around us offers and demands.

Flexibility in tailoring the GEF courses to each student's interests and needs will ensure that the time spent in the classroom, laboratory, or studio will fully develop the potential of each and every Mountaineer.
